

Services for Business and Government

Last Updated Monday, 28 April 2008

Techbridge Inc helps organizations - large and small - to plan, build and maintain operating efficiencies in their daily business. We help companies establish self-sustaining operations by implementing and closely managing their technology resource demands and, tackling the challenges associated with today's leading-edge business technology.

"Techbridge - Bridging Gaps between Business and Technology"™

Our certified and highly experienced consultants offer knowledge in emerging technology and proven tools to help your business function at a higher level of efficiency than you thought possible. We will listen to your organizations needs and help you address barriers to your business success with functional solutions that improve efficiency, reduce costs and drive growth.

The highly technical, fast-paced world in which we live presents new challenges in maintaining business growth and ultimately success. Our goal is to enable the best of business acumen by introducing technically innovative tools and processes that ultimately result in a technology-enabled versus technology-challenged business. We'll assist your organization to connect practical technical solutions to sensible business processes.

- Identifying, defining and re-engineering process
- Designing and implementing practical infrastructures that support process
- Developing and supporting user-friendly applications and tools to speed process

In support of this improvement framework, TechBridge delivers comprehensive solutions and services in all of the following critical business technology domains:

- Support and Repair Services
- Web Related Products and Services
- IT Sales, Rentals, Leases
- IT Asset Management
- IT Program Support
- Information Security & Continuity of Operations
- Data Backup, Recovery and Destruction

- Business Process Engineering
- Business Process Automation
- Network Engineering and Administration
- Web and Application Design/Development
